EDUCATION

Indian Institute of Information Technology (IIIT), Sonapat

Bachelor of Technology in Computer Science

Sonapat, India

Aug 2023 – Jun 2027

The Model School Abu Dhabi

Senior Secondary (XII) CBSE

Abu Dhabi, UAE

Apr 2021 – Mar 2023

Progressive English School Wadihuda

Secondary (X) CBSE

Kerala, India

Jun 2020 – Mar 2021

EXPERIENCE

Kiwisoft Solutions

Fullstack Developer Intern

Kannur, Kerala

Jun 2026 – Jul 2026

- Built two production-grade Spring Boot systems an Employee & Department Management System and a Recruitment & Job Portal spanning 10+ modules including Authentication, RBAC, Leave Management, Job Postings, and Audit Logging
- Designed 32+ secure RESTful APIs with Spring Security and JWT (access/refresh tokens), enforcing role-based access control across multiple user roles, and architected normalized PostgreSQL schemas across 18+ entities via Spring Data JPA/Hibernate
- Implemented multi-step approval workflows, centralized exception handling, and structured audit logging across both systems, and validated all endpoints using Postman for functional and integration testing

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA/Hibernate, FastAPI, Node.js/Express.js, WebSockets

Frontend: React.js, Streamlit, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

Auth & APIs: JWT, RBAC, RESTful APIs, Swagger/OpenAPI

AI/ML: Deep Learning, PyTorch, YOLOv8, XGBoost, OpenCV, Computer Vision, Gemini AI API / LLM Integration

Tools: Docker, AWS EC2, Git, GitHub, Postman

CS Fundamentals: DSA, OOP, DBMS, Computer Networks, Operating Systems

PROJECTS

- NutriVerse** | TypeScript, Node.js, Express.js, React, MongoDB, Redis, LangGraph, Gemini API, AWS EC2 Aug 2026 
- Architected and deployed a full-stack AI-powered recipe and nutrition platform using TypeScript, Node.js/Express, and React, implementing manual Dependency Injection and HttpOnly-cookie JWT authentication, provisioned on AWS EC2 (Nginx, PM2, HTTPS) with Vercel frontend hosting and Upstash Redis for cross-origin sessions and caching
 - Engineered an automated nutrition pipeline using the Gemini API for natural-language ingredient parsing, mapping outputs against the USDA FoodData Central REST API to compute 7 nutritional metrics per recipe, with Zod-validated schemas enforced end-to-end from parsing to database writes
 - Designed a LangGraph-based agentic recipe assistant with dynamic LLM tool-calling across a 4-node graph, where an explicit NO_MATCH signal from a MongoDB search tool lets the LLM autonomously decide to invoke a Gemini-backed fallback-generation tool, guarded by a recursion limit against infinite tool call loops
- Recruitment & Job Portal** | Java, Spring Boot, React, PostgreSQL, WebSocket, JWT Jul 2026 
- Delivered a full-stack recruitment platform with a Spring Boot REST API (50+ endpoints across 8 modules) powering job postings, candidate management, and partner/client assignment workflows, backed by 11 normalized PostgreSQL entities via Spring Data JPA/Hibernate
 - Implemented stateless JWT authentication with refresh-token rotation, cookie-based CSRF protection, and RBAC across 4 roles (Super Admin, Admin, Partner, Client) enforced at the endpoint level with Spring Security
 - Added real-time role-based messaging via Spring WebSocket, STOMP, and SockJS with PostgreSQL-backed conversation persistence, live delivery status, and duplicate-candidate validation via normalized email and phone
- NeuroScan.AI - Brain Tumor Detection Web App** | Python, YOLOv8, FastAPI, Streamlit, Computer Vision Nov 2025 
- Deployed a full-stack medical imaging application with a FastAPI backend exposing a documented REST API and a Streamlit frontend for real-time YOLOv8 brain tumor inference on MRI scans, achieving 96.3% mAP@50, 93.9% precision, and 94.0% recall on the validation set
 - Trained and fine-tuned a YOLOv8 object detection model across 4 tumor classes (Glioma, Meningioma, Pituitary, No Tumor) on 500+ MRI scans with data augmentation, improving generalization by 15% over the baseline
 - Crafted a production style modular frontend with session-based login authentication and annotated bounding-box visualization of detections, backed by a /health endpoint for model and system status monitoring

CERTIFICATIONS & ACHIEVEMENTS

- Secured 3rd Rank in “Guardians of the Algorithms” Intra-College Codathon organized by IIIT Sonapat
- Solved 700+ problems on coding platforms including LeetCode (Max rating: 1624, top 15% globally) and CodeChef (rating: 1540+)
- Certified Cyber Engineer - Computer & Network Security (CCE-CNS), IIT Madras - Proficiency Level A+
