EDUCATION

Indian Institute of Information Technology (IIIT), Sonapat

Bachelor of Technology in Computer Science

Sonapat, India

Aug 2023 – Jun 2027

The Model School Abu Dhabi

Senior Secondary (XII) CBSE

Abu Dhabi, UAE

Apr 2021 – Mar 2023

Progressive English School Wadihuda

Secondary (X) CBSE

Kerala, India

Jun 2020 – Mar 2021

EXPERIENCE

Kiwisoft Solutions

Fullstack Developer Intern

Kannur, Kerala

Jun 2026 – Present

- Built two production-grade Spring Boot systems — an Employee & Department Management System and a Recruitment/Job Portal spanning 10+ modules including Authentication, RBAC, Leave Management, Job Postings, and Audit Logging
- Designed 20+ secure RESTful APIs with Spring Security, JWT (access/refresh tokens), and role-based access across six roles (Admin, Manager, Employee, Super Admin, Partner, Client)
- Architected normalized PostgreSQL schemas across 12+ entities using Spring Data JPA/Hibernate, with pagination, indexed foreign keys, and optimized queries
- Implemented a multi-stage hiring workflow (Applied → Shortlisted → Interview → Offered/Rejected), OTP-based password reset, and duplicate-candidate detection

TECHNICAL SKILLS

Programming Languages: Java, Go, C++, Python, JavaScript, SQL

Backend Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML, CSS, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB; Schema Design, Query Optimization, Indexing

Security & Auth: JWT Authentication, Role-Based Access Control (RBAC), Spring Security

Machine Learning & AI: Deep Learning, Neural Networks, YOLOv8, XGBoost, Random Forest, Computer Vision

Cloud & DevOps: Docker, Linux, Git, GitHub, CI/CD Pipelines, Maven

Testing & Tools: JUnit, Postman, API Testing, Integration Testing

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems, Software Engineering

PROJECTS

Employee & Department Management System | Java, Spring Boot, PostgreSQL, JWT, JPA/Hibernate Jun 2026 – Present

- Built an enterprise-grade backend system across 6 modules (Auth, RBAC, Leave Management, Approval Workflows, Audit Logging) supporting 100+ employee records with full CRUD, Bean Validation, pagination, and DTO mapping
- Secured 12+ REST APIs using JWT stateless auth and Spring Security filter chain with custom UserDetailsService and role-scoped protection for ADMIN, MANAGER, and EMPLOYEE roles
- Implemented GlobalExceptionHandler, multi-step leave approval workflow (PENDING → APPROVED/REJECTED), and structured audit logging across 6 normalized PostgreSQL entities

Brain Tumor Detection System | Python, YOLO, OpenCV, Computer Vision

Nov 2025

- Trained a YOLO-based deep learning model to detect and localize brain tumors in MRI images, achieving approximately 91% detection accuracy on the validation set
- Processed and augmented a dataset of 500+ MRI scans using data preprocessing techniques, improving model generalization by 15%
- Deployed an end-to-end inference pipeline with automated visualization of predicted tumor regions, reducing manual diagnostic review time

FreshFinds - AI-Powered Sustainable Food Marketplace | MERN Stack, Sustainability

Oct 2025

- Launched an AI-powered MERN marketplace to reduce food waste, enabling vendors to list 200+ near-expiry products and connect with local consumers
- Engineered image-based freshness detection using computer vision, improving product classification accuracy to 85%
- Developed a role-based MERN platform with merchant dashboards, real-time product listings, and inventory management supporting 3 user roles

CERTIFICATIONS & ACHIEVEMENTS

Secured 3rd Rank in “Guardians of the Algorithms” Intra-College Codathon organized by IIIT Sonapat

Solved 500+ problems on coding platforms including LeetCode (Max rating: 1624); top 15% globally

Cybersecurity: Certified Cyber Engineer – Computer & Network Security (CCE-CNS)

Professional Development: McKinsey.org Forward Program
